

Daniel Crowe

Web & Graphic Designer

I am a mid-level web and graphic designer looking for a role that allows me to utilize my experience and challenges me to grow into a better designer. I work best in an environment that is engaging and team oriented, yet allows me to express my independent creativity.

Experience

iConstituent, LLC- Washington, D.C.

Web/Graphic Designer - August 2012 - Present

I am a Jack of all trades at iConstituent, handling all corporate branding, advertising, client web work, email marketing and print needs. I support over 90+ Congressional website and email marketing clients, design and create new websites templates on a custom CMS using HTML/CSS to reach my desired goal, and collaborate with other departments to design print and online marketing campaigns for our many products we offer to our Capitol Hill and public sector clients.

Web Development Group - Alexandria, VA

Jr. Web/Graphic Designer - June 2010 - Aug. 2012

This is where it all started. As a design intern right out of school, I was tasked with coordinating marketing needs on and off the Hill, from flyers and email marketing to face to face interaction with the clients. Once I became a full-time member of the team, I was responsible for client marketing, including advertisement production, custom web design, and email marketing templates.

Freelance

Web/Graphic Designer - 2011 - Present

Every designer craves an outlet to use their creativity outside of a structured work environment. Freelance has given me that outlet, and taught me a lot along the way. I have learned to collaborate independently with clients, and how to project and stick to deadlines without supervision. I have created numerous website mockups, full WordPress sites, and designed new branding from scratch. Some of my recent freelance clients included Alliance Interactive, Campesio Specialty Coffee, MedCanna Consulting, and 4Front Advisors.

Education

Full Sail University - Winter Park, Florida

B.S. in Digital Arts & Design - Aug 2009

I graduated from Full Sail with a 3.8 GPA. My major taught me the basics of design and also helped me start building my skills as a professional. I took classes ranging from color theory and typography, to 3D animation and motion graphics. Full Sail was very hands on; most classes were "labs", during which I worked behind a computer creating real work. Professors served as clients and mentors, and classmates were colleagues. I learned an excellent set of skills and turned them into something even more extraordinary, which has gotten me to where I am today.
